Step 1 Read Course & Experience Prerequisites & Fast FAQ's

Reaching the top is step-by-step process – that's why ArborMaster uses a graduated, systematic approach

ArborMaster modules are designed to provide a graduated, systematic approach, building on the knowledge and skills necessary to advance to the next level. L1 Tree Climbing Methods & L1 Precision Tree Felling & Chainsaw Handling do not have pre-requisites other than employment working in and around trees (see Eligibility). However, our L1 Arborist Rigging and our L2 modules do have pre-requisites and field experience/skill building requirements.

Why prerequisites before moving on to more advanced modules?

We want you to be safe and to excel!

It is our experience that in order to achieve this, a key component is to build on a firm foundation of skill, knowledge and industry best practices, through a graduated, systematic approach. Even students with many years of experience have reported learning many valuable techniques and that they were "humbled at how much there was still to learn".

Why experience & skill building before moving on to more advanced modules?

We want you to be safe and to excel!

In our experience, if a student has little or no prior field experience and has not had the time to build on skills learned in our L1 Tree Climbing and L1 Precision Tree Felling modules, he/she may be putting themselves at risk to move on too quickly to any of our advanced modules.

We don't want you to waste your valuable time or your money if you are not yet prepared to learn more advanced techniques and methods. It's that simple.
